Personal Profile

A motivated and diligent third-year student pursuing a BSc (Hons) in Software Engineering at Manchester Metropolitan University, working towards achieving first class. With excellent communication, strong troubleshooting, and technical skills. I have vast knowledge of programming languages, web applications and frameworks. I have over two years of coding and technical experience, working with different companies. A fast learner who has strong time management and multitasking skills, a strong work ethic in team or individual settings. I am now seeking a graduate role in the software engineering field.

Education

BSc (Hons) Software Engineering
Manchester Metropolitan University, Manchester UK, September 2021/Current

- **Relevant Modules: Thematic Project (87%)**: I have enhanced on various skills, for instance, project management, project planning, problem solving, teamwork, and communication. - **GCSEs**, Math and English, Grade: 4

Smithills School, Bolton UK, September 2016/June 2017
BSC Level 2 ECDL Certificate in IT Application Skills
- **Grade:** Distinction

Experience

Software Engineer
Unisys, Manchester UK, April 2023/July 2024

- Attending meetings and keep all my colleagues from different teams updated on the progress of various projects that I am working on, some of the skills I used were time management, teamwork and engaging with clients on a daily basis.
- I worked on different roles for various client projects, some of the roles I worked on were font-end developer, back-end developer, test engineer, and project manager, fulfilling day-to-day activities on all the projects depending on the role I was working on.
- Successfully completed two projects from start to finish, as the projects were completed within the timeframe the company was given the support contract for both of the projects.
- After successfully completing the project on which I was working as a project manager, with no delays or obstacles, the bank offered our company the opportunity to take on additional projects.

Software Engineer Internship

Manchester Metropolitan University, Manchester UK, June 2022/September 2022

- Attending meetings and keep all my colleagues from different departments updated on the progress of the website and building a website to showcase the game, some of the skills I used were time management, teamwork and the ability to communicate with both technical and non-technical people.
- Once the website was created, the government approved the funds to hire more staff to work on and finish off the project.

Projects

CBT Game
Software Developer, Manchester Metropolitan University, June 2022/September 2022
- Creating a website to showcase a game being designed by the psychology department at Manchester Metropolitan University, government organisations invested more than 4 million pounds.
- The website was successfully finished and the project team was given a go head to work on the actual game.

SE Chatroom
Scrum Master, Manchester Metropolitan University, January 2022/March 2022
- Creating a web application similar to Vevox for the project unit at the end of first year of the university. The scope of the project was similar to the software already in the market, but in my project, I implemented a backend database in our software so it could save all the messages, as this feature is not available in the software already on the market, which was successfully implemented.
- The backend database was successfully implemented into the new software that I created, and my project was awarded the best project of the year.

Technical Skills

- HTML/HTML5
- CSS/CSS3
- C#
- .Net
- JavaScript (NodeJS, ExpressJS and VueJS)
- Java
- Blazor
- Photoshop
- SQL
- GitHub
- Eclipse
- Visual Studio Code
- Project planning/Managing
- Software Design and Architecture

Interpersonal Skills

- Ability to work under pressure.
- Analytical skills.
- Details oriented.
- Problem solving.
- Time management.
- Teamwork.
- Communication skills.
- Presentation skills.
- Leadership Skills.

Languages

- English
- Urdu
- Punjabi
- Italian

Certificates

- Workplace Health and Safety
- Fire Marshal
